

SC2 advances while model requests run in the background

Optional Astra plan: candidate rules in constrained mode; context in advisory mode

Configuration	Astra plan	Plan masks	Selector
Pure random	Absent	None	Random
JEV-only	Absent	None	JEV
Astra constrained + random	Present	Applied	Random
Astra constrained + JEV	Present	Applied	JEV
Astra advisory + JEV	Present	None	JEV

Every configuration retains local availability and execution rules; WAIT is a candidate.
